Lightweight sliding pillar

Roll-up rear curtain,  
as optional extra

Aluminium sideboards,  
as optional extra

Tail lift,  
as optional extra

## Eurolib XS

Its fully bolted design makes the fitting of the kit much easier. The use of lightweight materials such as aluminium gives a greater payload, for vehicles up to 6.5T GVW (Gross Vehicle Weight).

The Eurolib XS is designed to offer numerous optional extras such as: sliding roof, aluminium sideboards or roll-up rear PVC curtains.

The number of optional extras makes this body an absolutely universal product, for a maximum of uses.
